PROFILE

Junior Software Engineer with hands-on experience building full-stack web applications using JavaScript and modern frameworks. Strong foundation in backend development, API design, and database management, with growing exposure to cloud infrastructure and scalable system design.

Focused on developing production-ready applications, improving code quality, and learning distributed systems, AI integration, and modern DevOps practices. Demonstrates consistent growth, problem-solving ability, and the capacity to quickly adapt to new technologies in fast-paced environments.

PROFESSIONAL EXPERIENCE

Junior Software Engineer
Freelance / Personal Projects
2024 – Present

- Build and deploy full-stack web applications using React, Node.js, and Django.
- Design and implement RESTful APIs, handling authentication, routing, and data persistence.
- Develop responsive fronted interfaces with emphasis on usability and performance.
- Work with relational databases (MySQL/PostgreSQL) for data modeling and querying.
- Use Git for version control and collaborate through structured workflows.
- Deploy applications to cloud environments and manage basic server configurations.
- Continuously improve debugging, testing, and code structuring practices.

Tech: JavaScript, React, Node.js, Django, MySQL/PostgreSQL, Git

---

PROJECT EXPERIENCE

Full-Stack Web Application (e.g., SaaS / Dashboard / API Project)

- Built a complete application with frontend and backend separation.
- Implemented authentication and protected routes.
- Designed REST API structure and handled CRUD operations.

- Integrated database with proper schema design.

API-Based Backend Project

- Developed backend service using Node.js and Django.
- Implemented API endpoints and handled business logic.
- Structured code for scalability and maintainability.

EDUCATION

Lagos State University

SKILLS

Languages
JavaScript, TypeScript, Python

Frontend
React

Backend
Node.js, Django, REST APIs

Databases
MySQL, PostgreSQL

Tools & Practices
Git, CI/CD (basic), debugging, testing fundamentals, Prisma(ORM), Linux

Learning / Exposure
Docker, AWS, micro-services, AI/ML concepts, Web3 fundamentals, Java

---

LANGUAGES

English
